(UNOFFICIAL TRANSLATION)

Official Gazette of the Federation: 16/05/2022

Decree that exempts the payment of import taxes on the goods indicated.

In the margin a seal with the National Shield, which says: United Mexican States.- Presidency of the Republic.

ANDRÉS MANUEL LÓPEZ OBRADOR, President of the United Mexican States, in exercise of the powers conferred on me by articles 89, section I, and 131 of the Political Constitution of the United Mexican States; and based on articles 4, section I, and 12 of the Foreign Trade Law, 31 and 34 of the Organic Law of the Federal Public Administration, and

CONSIDERING

That article 25, first paragraph of the Political Constitution of the United Mexican States establishes that the State is responsible for guiding national development to ensure that it is integral and sustainable; strengthen the sovereignty of the Nation and its democratic regime and that, through competitiveness, the promotion of economic growth and employment and a fairer distribution of income and wealth, the full exercise of freedom and dignity of individuals, groups and social classes will be allowed;

That article 131, second paragraph, of the Political Constitution of the United Mexican States confers on the President of the Republic the extraordinary power to increase, decrease or eliminate the export and import tariff quotas issued by the Congress of the Union and to create others; as well as to restrict and prohibit imports, exports and the transit of products, articles and effects, when it deems it urgent, in order to regulate foreign trade, the country's economy, the stability of national production or to carry out any other purpose, for the benefit of the country;

That on July 12, 2019, the National Development Plan 2019-2024 was published in the Official Gazette of the Federation (DOF), which provides in its General Axis III. Economy, "Promote economic reactivation, the internal market and employment", for which one of the central tasks of the current administration is to establish a salary recovery policy, which cannot be separated from purchasing power, since in a scenario of high inflation, wage recovery is limited by price increases;

That on July 1, 2020, the Law on General Import and Export Taxes was published in the DOF, which establishes the tariff rate applicable to the import and export of goods in national territory, modified by Decrees published in the DOF on December 24, 2020, February 22, 2021, July 16, 2021, October 22, 2021, November 18 and 22, 2021;

That the National Institute of Statistics, Geography and Informatics (INEGI) reported that, for the first fortnight of April 2022, annual inflation in Mexico stood at a rate of 7.72%, with a growth of 0.16%, compared to the previous fortnight (1). On the other hand, the general minimum wage for 2022 was set at 172.87 pesos per day, equivalent to a growth of 22%, compared to the previous year, which, although it helps to recover purchasing power its effect was limited by the inflationary scenario;

That on May 4, 2022, the Federal Executive, through the Ministry of Finance and Public Credit, announced the Package Against Inflation and Famine, through which the Federal Government, with the purpose of reducing inflation and the fall in the consumption of Mexican households, through various measures, among which is exempting 21 products from the basic basket and 6 strategic inputs from import taxes;

That in order to counteract the effects on prices derived from the inflationary trend, it is necessary and urgent to temporarily exempt the payment of import taxes for products classified in 66 tariff items that are part of the basic basket and the following products: corn oil, rice, tuna, pork, chicken, beef, onion, jalapeño pepper, beans, corn flour, wheat flour, egg, toilet soap, tomato, milk, lemon, white corn, apple, orange, box bread, potato, pasta for soup, sardine, sorghum, wheat and carrot;

That it is also necessary and urgent to temporarily exempt the payment of import taxes for products classified in 6 tariff items that are part of the consumption of Mexican families: live animals of the bovine, porcine, ovine or caprine species, roosters and chickens;

That the establishment of the measures provided in this Decree does not relieve importers of the obligation to comply with all regulations and non-tariff restrictions on merchandise, as well as with the quality and efficiency characteristics necessary to protect life and safety of all people, particularly those applicable in the phytosanitary and zoosanitary field, and

That the tariff measures referred to in this Decree are applicable based on the opinions of the Foreign Trade Commission in accordance with the provisions of the Foreign Trade Law, for which I have seen fit to issue the following

DECREE

First article. The tariffs of the tariff fractions of the Rate of the Law of General Import and Export Taxes, published in the Official Gazette of the Federation on July 1, 2020 and its subsequent modifications, are modified, only with regard to the importation of goods in accordance with the following:
